-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1724

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1–9, drawn to a method, classified in class 210, subclass 601+.
- II. Claims 15-26, drawn to an apparatus, classified in class 210, subclass 175+.
- III. Claim 10, drawn to an agricultural liming agent, classified in class 8, subclass 94.17.
- IV. Claim 11, drawn to a soil conditioner, classified in class 504, subclass 116.
- V. Claim 12, drawn to a fertilizer, classified in class 71, subclass 12.
- VI. Claim 13, drawn to a topsoil blend, classified in class 71, subclass 903.
- VII. Claim 14, drawn to a fuel, classified in class 210, subclass 609.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP§ 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process. Moreover, the process as claimed can be practiced by another materially different apparatus.

Inventions I and III through VII are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make other and materially different product. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

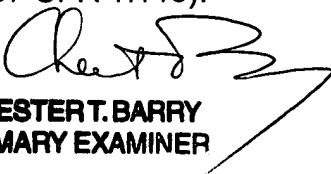

Inventions II and each of III - VII are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product and the product as claimed can be made by another and materially different apparatus.

Inventions III through VII are unrelated to each other. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). They are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects.

A telephone call was made to Mr. McCarthy on or about 12/6/05 to articulate the foregoing request for an election, but the examiner's phone call was not returned as of 12/9/05 1:22:10 PM.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
